PROFILE

Advanced experience in application development with profound knowledge of modern web technologies and very good object-oriented programming skills. Expertise spans conception, implementation, and further development of various applications in the web and app area including interface creation to third-party systems. Combines analytical and conceptual skills with strong communication and teamwork abilities to deliver creative solutions for complex tasks.

TECHNICAL SKILLS

Category	Technologies
Cloud & Infrastructure	AWS, Docker, Kubernetes, Terraform
CI/CD & Automation	Jenkins, GitHub Actions, Ansible, SonarQube
Monitoring & Logging	Prometheus, Grafana, Winston
Security (DevSecOps)	JWT, Helm, bcrypt, Rate Limiting, API Security
Backend Development	Spring Boot (JPA/Hibernate), Django, Laravel, Node.js, Express.js, RESTful APIs
Frontend Development	Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind
Databases	MongoDB, MySQL, PostgreSQL
Scripting & OS	Python, Bash, Linux (Ubuntu, Debian), Windows Server

PROFESSIONAL EXPERIENCE

ISET Tozeur — Software & DevOps Engineer (Full-Stack)

Internship | 02/2024 – 06/2024

- Operated an 8-microservice Kubernetes cluster for Spring Boot applications, ensuring high availability and orchestration stability.
- Architected and deployed a secure Angular administration portal using Role-Based Access Control (RBAC) to streamline and optimize complex academic operations.
- Engineered distributed microservices and REST APIs, ensuring modular scalability and high-performance backend communication.
- Standardized delivery pipelines using Jenkins and SonarQube, automating code quality gates and accelerating the release cycle.
- Hardened API security and infrastructure by implementing Spring Security, JWT authentication, and rate limiting to prevent unauthorized access and ensure data integrity.
- Established a comprehensive observability stack using Prometheus, Grafana, and Winston to enable real-time incident detection and service health tracking.

Tahar Sfar University Hospital — Software Engineer (Healthcare Systems)

Internship | 02/2022 – 06/2022

- Developed, launched, and deployed a centralized, high-traceability complaints management platform, digitizing critical workflows and ensuring system uptime in a high-compliance hospital environment.
- Automated medical resource tracking by engineering a real-time inventory system, significantly reducing manual administrative errors and increasing resource visibility.

LeaderPos — Full-Stack Developer

Internship | 08/2021 – 09/2021

- Engineered a scalable, high-performance backend using Django and MongoDB to handle complex order, product, and high-frequency session lifecycles.
- Optimized user experience and system reliability by implementing a dynamic cart engine and real-time stock tracking workflows.
- Built a specialized admin interface using Bootstrap to manage secure payment simulations and backend operations.

EDUCATION

National Professional Master's Degree | ISET Tozeur (2022 – 2024)

- Field: Technological Sciences | Major: Computer Science
- Specialization: DevOps (Development, Operations) and Cloud Computing

National Bachelor's Degree | ISET Mahdia (2019 – 2022)

- Field: Exact Sciences and Technology | Major: Information Technology
- Specialization: Web Development and Multimedia
