COVER LETTER – JUNIOR FULLSTACK DEVELOPER (M/F/D) – RODING, GERMANY

Dear Hiring Team,

I am writing to express my strong interest in the Junior Fullstack Developer position at your new location in Roding, Germany. With a Master's degree in DevOps and Cloud Computing, hands-on experience in full-stack development, and a passion for building modern web applications, I am confident that I can contribute effectively to your team.

In my recent internship at ISET Tozeur, I engineered distributed microservices and REST APIs using Spring Boot, and developed secure Angular dashboards with Role-Based Access Control (RBAC). These projects required both conception and implementation, as well as close collaboration with academic stakeholders – skills that align directly with your responsibilities of "Requirements management and documentation" and "Advice to the specialist departments".

My experience also includes creating mockups and design concepts for administrative portals, and implementing interfaces to third-party systems such as payment gateways and inventory trackers. During my internship at Tahar Sfar University Hospital, I built a real-time medical inventory system and a fully traceable complaints platform, handling everything from database design to frontend deployment.

The job description emphasises "advanced experience in application development" and "profound knowledge of modern web technologies". I have worked extensively with Angular, TypeScript, JavaScript, Spring Boot, Node.js, and MongoDB. My object-oriented programming skills are solid, and I have also administered web servers (Linux, Nginx) during my DevOps training – a plus you mentioned.

Beyond technical skills, I value communication, teamwork, and creative problem-solving. I enjoy tackling complex tasks and delivering clean, user-friendly solutions. I am eager to bring my full-stack expertise and continuous learning mindset to your team in Roding, and I am ready to relocate for the right opportunity.

Thank you for considering my application. I would welcome the chance to discuss how my background matches your needs.

Sincerely,

Mohamed Tababi
